<b>Office Action Summary</b>	<b>Application No.</b> 10/817,076	<b>Applicant(s)</b> CHERON, ERIC	
	<b>Examiner</b> JINSONG HU	<b>Art Unit</b> 2454	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 19 September 2008.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

### **DETAILED ACTION**

1. Claims 1-9 are presented for examination. Claim 1 has been amended.

#### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

As per claim 1, the limitations disclose a process performed by installer's manual action, which is directed to a judicial exception to 35 U.S.C. 101, i.e., natural phenomenon. It is apparently that the limitations do not fall within any one of the category of statutory subject matter.

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2454

5. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Myer et al. (US 6,574,234).

6. As per claims 1 and 3-6, Myer teaches the invention substantially as claimed including a process for assembling a group of networked elements controlling equipment of a building, wherein when the elements are in a learning mode [col. 7, lines 10-16 & 53-62], a first action exerted by an installer on one of the elements is interpreted as an interrogation of the element concerning the element's state of membership in the group (included--excluded) and triggers the emission of an information signal regarding its state [col. 8, lines 15-34], and a following action exerted by an installer on this element is interpretable as an order for modifying the element's state of membership in the group [col. 8, lines 34-55; col. 18, line 53 – col. 19, line 55].

7. Myer teaches all limitations except manual action. However, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to manually perform those steps because Myer already disclosed the assembling procedure. One of ordinary skill in the art would have been motivated to modify Myer's assembling process with human actions to enable the process under human control.

8. As per claim 2, Myer teaches the element emits this information signal during a timeout (T') [col. 19, lines 10-20].

Art Unit: 2454

9. As per claim 7, Myer teaches a pulse engendered manually on a program relating to this element [col. 8, lines 34-55; col. 18, line 53 – col. 19, line 55].

10. As per claims 8 and 9, since they are system claims of claims 1-7, they are rejected for the same basis as claims 1-7 above.

### ***Conclusion***

11. Applicant's arguments with respect to the newly added limitations have been considered but are moot in view of the new ground(s) of rejection. See paragraph 4 and 5 of this action for details.

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

13. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2454

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinsong Hu whose telephone number is (571) 272-3965. The examiner can normally be reached on 8:00 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn can be reached on (571) 272-1915. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
